FOUNDATION

8TH
CONFERENCE

6-8 FEBRUARY 2019
WROCLAW, POLAND

Dear Friends and Colleagues

The European Hidradenitis Suppurativa Foundation (EHSF) holds its 8th Conference in Wroclaw, Poland. It is a great honour for us to guest outstanding clinicians and researches not only from European countries, but from all over the world. I am sure that the conference will promote all aspects of hidradenitis suppurativa research.

Wroclaw, lying on both banks of the Odra river, is a unique city with 12 islands and 112 bridges. As the main city of Lower Silesia it is the region's economic, cultural and scientific capital. Wroclaw has been a place where various nationalities and numerous cultures meet. Nowadays it combines rich thousand-year history with modern life. Guests may see valuable architectural monuments, magic places, such as the Town Hall, Ostrów Tumski with the St. John Baptist Cathedral and Raławice Panorama - an extraordinary exhibition of the famous monumental painting of the battle. Moreover, visitors can find dozens of restaurants, cafes and pubs set in the historical beautiful center. In 2016 Wroclaw was the European Capital of Culture.

The 8th EHSF Conference in Wroclaw welcomes every contribution from those devoted to the progres of hidradenitis suppurativa research. It is our goal to have an international interdisciplinary meeting addressing physicians and scientists especially in dermatology and all other fields of related experimental medicine. I believe Wroclaw's warm hospitality, pleasant atmosphere make our city the ideal place for this purpose. I do hope that besides the outstanding scientific program, participants will have opportunity to visit our city, enjoy social events and make new friendships. I wish you a fruitful meeting and an unforgettable stay in Wroclaw.

On behalf of the Organizing Committee

Prof. Jacek C. Szepietowski, M.D. Ph.D.

Conference President

Dear Colleagues, Participants of the 8th International EHSF Conference

The EHSF e.V. celebrates 13 years of fascinating work to be mirrored by your 120 submitted contributions, which summarize HS research and clinical activities on going around the globe. As EHSF e.V. president, I am impressed for what we have reached together. The huge developments in understanding HS pathophysiology and the needs of medical and psychological care of HS patients but also the targets for the years to come are the central subjects of the 8th International EHSF Conference. Parallely, EHSF e.V. salutes all caring physicians and scientists, independently of their specialization, since the emerging HS comorbid disorders require an interdisciplinary approach.

There is a general consensus that it is difficult, even for experts, to follow the rapidly growing knowledge in the field. Therefore, I am honoured and pleased to welcome you together with our local hosts, Profs. Jacek C. Szepietowski and Łukasz Matusiak, at the 8th International EHSF Conference taking place at the traditional university city of Wroclaw. Our purpose was to construct a scientific programme of high impact providing current information on research and its clinical relevance on HS. The speakers have been selected among those of you, who submitted abstracts. Both experts in the field and motivated upcoming specialists are participating, but also young scientists and students working or wishing to work in this interesting field in the future and partners of the pharmaceutical industry. During the Conference you will have the opportunity to share your knowledge and perspectives and gain a better insight into HS. In addition to the fulfillment of your scientific expectations, I have no doubt that the 8th International EHSF Conference will become an unforgettable experience, especially since our local hosts have overtaken best efforts to satisfy your networking wishes and to present you Wroclaw and its warm-hearted people.

On behalf of the Organizing and Scientific Programme Committees

Prof. Dr. Prof. honoraire Dr. h.c. Christos C. Zouboulis
President of the EHSF e.V.

The Wrocław Opera

Wrocław, 35 Świdnicka Street

WEDNESDAY 6TH OF FEBRUARY 2019

4.00 PM **Opening Ceremony**

The Wrocław Opera is one of the largest and most significant opera theatres in Poland. It was built in a classicistic style according the designs of architect Carl Ferdinand Langhans and opened in 1841 as the Breslau Opera. Extremely modern for its time, the theatre could hold an audience of up to 1600 spectators. Excluding break periods caused by fires in 1865 and 1871 the Wrocław Opera was actively present on the cultural map until 1944. During that time it became know as one of the leading German stages. After the Second World War the Wrocław Opera reassumed activity as a Polish theater. Stanisław Moniuszko's "Halka", which premiered on September 8th, 1945 marks the first performance shown to audiences after the war. Since then there were 11 premieres of this opera. Last one on the 14th and 15th of December 2018 marked the beginning of Moniuszko's Year commemorating the 200th anniversary of the composer. The theater cooperates with famous producers and singers from all over the world. Its productions are recognized worldwide.

Africarium

Wroclaw, 1-5 Wróblewskiego Street, Vip Gate

THURSDAY 7TH OF FEBRUARY 2019

7.00 PM **Gala Dinner**

6.00 PM **transfer from Novotel Hotel to Africarium**

The Conference dinner during the 8th Conference of the European Hidradenitis Suppurativa Foundation will take place in Africarium, which is the first oceanarium in Poland and the only one in the world devoted to the flora and fauna of just one continent.

Africarium is a globally unique complex, depicting varied ecosystems related to an aquatic environment of the Dark Continent. The coral reef ecosystem was created in a reservoir with capacity of million liters of water, where one can admire over 60 species of beautiful and colourful fish.

Before refreshments we will stroll through the Africarium to observe: the common hippopotamus, remarkable aardvark frequently confused with South American giant anteater, colonies of naked mole-rat – extraordinary rodents, the aquaria with endemic fishes from lakes of the Great Rift Valley and the smallest antelope – dik-dik. We will marvel at green sea turtle, sharks, but also brown fur seal and African penguin. We will hope to catch a glimpse of jellyfishes, moray eels or quaint species of fish such as red lionfish. The reservoir is also inhabited by crocodiles and African manatee – uncanny, herbivorous mammal also known as a mermaid. Recently, all the species were joined by numerous birds. It is a rare opportunity to host you in a such exquisite place. We truly welcome you to join us!
